Major Arteries of the Abdominal Region

(a) Abdominal wall, anterior view

Abdominal Aorta

Celiac Trunk: superior branch off of the abdominal aorta. Branches immediately into the **right & left gastric artery**, the **splenic artery** and the **common hepatic artery**.

Celiac Trunk (1)

Splits into the:

Left Gastric Artery (2)

Splenic Artery (3)

Common Hepatic Artery (4)

Right Gastric Artery (5)

2. Superior Mesenteric Artery

3. Right & Left Renal Arteries

(b) Veins of right upper limb, anterior view

Major Veins of the Abdominal Region

Hepatic Portal Vein: drains the blood of the digestive viscera, spleen and pancreas and delivers it to the liver. The hepatic portal vein receives blood from the **Splenic Vein**, **Superior Mesenteric Vein**, **Gastric Vein** and **Inferior Mesenteric Vein**.

Hepatic Vein (1)

Hepatic Portal Vein (2)

Receives blood from the:

Gastric Vein (3)

Splenic Vein (4)

Superior Mesenteric Vein (5)

Inferior Mesenteric Vein
